Code-Writing Quiz Grading Guidelines

1. Use red pen for grading. The pen will be provided.
2. Put your name on the work you grade: add GB Your Name to the page.
3. Please mark ALL syntax errors. Count how many you found and write the total on the paper.
4. Mark logic errors. Add a very short note explaining what is wrong with logic in the code sample.
5. Assign a grade to the work: 0 or 1 or 2 or 3. Write the grade clearly on the paper. Use the following guidelines when grading:
   - grade 0
      i. No code written OR
      ii. Solution of a totally different problem is written out (copied from somewhere) OR
      iii. A bunch of statements is written but there is no logical connection among them and they are not solving the problem
   - grade 1
      i. This grade is given to a work that looks like a good start. There may be some part of the problem solved but important details are missing. Syntax is clearly present but may have some flaws. OR
      ii. The problem is solved but the solution has a big logic flaw.
   - grade 2
      i. The problem solution is written out but has a lot of syntax errors.
      ii. The solution is missing one of the important requirements listed in the problem
   - grade 3
      i. The solution is correct and has no more than 3 minor syntax errors.
6. Turn in the work you graded to the instructor.
